

Push & Pull Lipstick

A versatile item that is suitable for lip or face products; with a modular approach with the click-in Porto Lipstick (also available as a stand-alone pack). The container is operated by pushing the lipstick at one end of the pack, which then allows access to the product at the other end. Each individual lipstick base can be colour-matched to the formula to provide excellent shade ID and provide a distinctive selling point. The outer casing can be coloured, sprayed or metallised to achieve a premium customised appearance as well as screen printed to hotfoil stamped to add branding.

HCP Ref:
54V
